speedline

Speedline is 47% polyester, 53% PBT (texturized polyester with natural stretch similar to spandex), 170 grams per square meter. This fabric is chlorine resistant and has two way stretch, although not as much stretch as Lycra®. Speedline is sleek to touch.

streamline

Streamline is a high technology fabric designed to reduce drag by its water repellent stripes. This fabric is knitted 75% polyester, 24% spandex, 240 grams per square meter, with water repellent resin stripes. Streamline is sleek and smooth to the touch. It is a denser fabric than Lycra®.

mesh

Mesh is 100% knitted polyester in a mesh-like pattern, with small holes.

canvas

Canvas is a heavy, coarse, closely woven 600 denier polyester with urethane backing.

polyester

100% woven polyester is a smooth, durable fabric that is sleek to the touch and quick drying.

polyflon

PolyFlon is 80% polyester, 20% spandex, 190 grams per square meter. This fabric is teflon coated to reduce drag and extend the life of the fabric.

knit polyester

100% knit polyester is soft to the touch and quick drying. It is similar to the "nylon" swimsuits manufactured back in the 60s and 70s. It is very durable and does not degrade in chlorine.

coolmax®

Coolmax® is 100% polyester. This fiber is made of four channels that pull moisture away from skin. It dries five times faster than cotton. Coolmax® also offers superior breathability.

paper

Paper is woven 79% polyester, 21% spandex, 150 grams per square meter. It is coated with Teflon®, making it water repellent. This is our lightest fabric, designed for racing.

duramax

Duramax is 40% polyester, 60% PBT (texturized polyester with natural stretch similar to spandex), 200 grams per square meter. This fabric is chlorine resistant and has two way stretch, although not as much stretch as Lycra®. Duramax is sleek to touch.

maxresist

These suits have a water repellent coating to limit water absorption. They also have a limited number of seams in order to reduce drag.
